

Treatment Plant Trainee

- 3 year Trainee Appointment
- Treatment Plant Optimisation
- Yarra Valley Water

Yarra Valley Water provides essential water supply and sanitation services to over 1.7 million people who live and work in the northern and eastern suburbs of Melbourne. As an industry leader involved in exciting and innovative service solutions, we are committed to delivering exemplary water and sanitation services that contribute to the health and wellbeing of current and future generations.

We're passionate about delivering extraordinary outcomes. Our award-winning culture fosters an inclusive, collaborative work environment and provides the development opportunities, flexibility and support that enable high levels of achievement and personal satisfaction. Our long term strategy includes a commitment to put customers at the centre of how we think, and what we do, and to adopt a restorative approach to looking after the environment. We're for thriving communities, and our work environment is a match for our strategic commitments

The Role

Treatment Plant Optimisation is committed to enhancing our community and environment by optimising recycled water and sewage treatment services. With 10 Sewage Treatment Plants and 3 Recycled Water Treatment Plants located in the northern and eastern suburbs of Melbourne, there are exciting and challenging opportunities for anyone with the passion and drive to explore a new direction for themselves by joining our Team and contributing to the continuous improvement of sewage treatment and recycled water production.

Working as an integral part of a close-knit team the role will assist in ensuring that the plants remain within their operating envelope and quality standards are maintained. As a Trainee you will receive on the job training, education and experience in many facets of recycled water and/or wastewater treatment plant operations and reuse schemes. You will gain experience and exposure to a variety of work including monitoring and recording plant performance through carrying out laboratory testing and analysis of instrument and performance data, under guidance from the Treatment Plant Optimisation Team. You will also contribute toward achieving a supportive, collaborative and constructive culture that includes providing support as required to the Treatment Plant Optimisation Team.

We are looking for candidates to demonstrate a high level of initiative and have an enthusiastic attitude to learning, have excellent problem solving skills and an ability to excel in a team environment. Further to your success will be knowledge of Microsoft Word, Excel and Outlook, as well as, a high attention to detail and a commitment to culture of safety.

Further Requirements:

- Current Victorian Drivers Licence
- The role is required to work across all YVW Treatment Plant sites (a vehicle will be provided for travel between sites)
- There is a mandatory requirement that you have vaccinations for Hepatitis A & B and Tetanus

The Benefits

- Flexible working arrangements considered
- Generous personal leave entitlements
- Training and development opportunities
- Onsite parking, canteen and fitness group
- Free flu vaccinations
- Social events, skill-sharing and networking opportunities

This full-time fixed term (3 year) role is classified as an Officer Level 1 (\$57,698) per annum plus superannuation.

How to apply

- Applications should be submitted through the 'Apply Now' button and include a supporting Cover Letter and Resume.

Closing date: 01 October 2018
