

# NEW NEEDS YOU

## Faculty of Health and Medicine Research Associate

Job Ref# 3777

### About Us

At the University of Newcastle, our staff are curious. We think big, see opportunity and are open to ideas and ask why. We share wisdom and partner with colleagues in Australia and around the globe to create an enduring impact. And we're courageous - bold thinkers who have the confidence to take risks and to inspire change.

The University has an international reputation for research excellence and we continue to build on our research strengths, engagement with industry and partnering with outstanding international universities.

### Is NEW for you?

The Health Behaviour Research Collaborative undertake research in a broad range of fields which currently include dementia; Indigenous health; cancer; mental illness; diabetes; alcohol consumption; and stroke.

This collaborative is made up of researchers and students from the University of Newcastle who are affiliated with the University's Priority Research Centre for Health Behaviour and the Hunter Medical Research Institute (HMRI).

Located in New Lambton Heights, HMRI is a world-class institute and is located on the John Hunter Hospital campus in Newcastle and offers the most advanced and cutting edge research facilities and services in the area. With a unique position located strategically to bring together University researchers and clinical staff, HMRI is a research hub, providing a focal point for coordinating strategy, resources and funding to improve the health of both the local and global community.

This role is fixed term for 12 months, full time.

### What will you do?

- Ensure agreed research project milestone tasks are met
- Monitor and maintain research ethics and funding body requirements
- Provide effective supervision to junior research staff
- Promote research outcomes through presentations, performance, exhibitions media interviews, articles and reports.

### About You

- Completion of a doctoral qualification in social science, medicine or a relevant allied health discipline.
- Demonstrated experience working collaboratively across disciplines locally, regionally and nationally.
- Evidence of understanding of research methodologies relevant to behavioural science.
- Evidence of capacity to generate high quality publications.
-
