**Department of Defence**

## **Signals Intelligence Technologist**

**ASD 4 - 5**

**\$67,100 - \$78,873 (plus super)**

**Fairbairn, ACT**

The Data Science & Engineering (DS&E) Branch within the Australian Signals Directorate (ASD) is seeking highly motivated applicants from Aboriginal and Torres Strait Islander Australians to fill a number of technical ASD4 and ASD5 Signals Intelligence Technologist positions within the Branch.

These positions are available within a cross-functional team in DS&E ranging from the development and support of a data processing system through to data analysis, technical training and support to users. The roles available require the ability to learn complex skills and apply them to the solution of difficult problems, the ability to contribute productively to teams of diverse skills, and independence in researching and solving complex problems. Technical training specific to the roles will be provided to successful applicants, as required, to fulfil functions in software development, data analysis, and data processing. For ASD4 and ASD5 applicants, demonstrated aptitude to learn and operate effectively in a software development, data analysis, and/or data processing environment is required.

As a Branch we have a strong technical data engineering focus. To deliver a world class data science capability we have a strong interest in fostering a culture of diversity, innovation, and adopting contemporary engineering practice to ensure we deliver at the velocity required by our customers. This includes not only the development and sustainment of systems but also the use of these systems to provide cutting-edge analytic capability.

A merit pool will be created from this round to potentially fill future positions. ASD5 positions also attract a Building Defence Capability Payment (BDCP) and performance bonus.

To be eligible to apply for this Indigenous Affirmative Measures round, you must be an Australian citizen, have proof of Aboriginal and Torres Strait Islander Heritage and be willing to undergo a security clearance check.

**Application Closing Date: Thursday, 9 April 2020**
