

Scientia Program – Aboriginal or Torres Strait Islander Researcher

Job no: 501464

Work type: Full-time, Part-time

Location: Sydney, NSW

Categories: Senior Lecturer, Associate Professor, Lecturer, Associate Lecturer, Eligible for a Scientia academic position

UNSW is recruiting an Aboriginal or Torres Strait Islander researcher, across any discipline for a position on the prestigious Scientia Program. If you are an Aboriginal or Torres Strait Islander with an outstanding research track record who shares our vision of improving and transforming lives, apply for a Scientia academic position by clicking the Apply Now button below.

If you are successful, you will be appointed to a tenure track position. In addition, you will receive unique benefits, guaranteed collaboration and development funding and individualised career support to expand your global impact.

About the UNSW Scientia Program

The UNSW Scientia Program is one of the cornerstones of UNSW's 2025 Strategy. A primary goal of the Program is to enhance UNSW's research performance by attracting and retaining exceptional early to mid-career researchers, with outstanding research track records. Scientia academics will be leaders in their School and Faculty and engage with the three pillars of social engagement, global impact, and academic excellence.

UNSW Scientia academics have access to a range of development opportunities tailored to their level of experience across research, teaching and leadership. Scientia academics will be mentored and will also develop the skills required to become mentors and research leaders themselves.

Appointments are made on a Convertible Tenure Track contract. The initial engagement is for 4 years fixed term with the possibility to convert to continuing tenure. The program also allows flexibility to take research breaks to do other studies, take an industry engagement or follow other interests. We are also open to part-time appointments.
